

Registering Natural Log For users with Windows Vista

At bottom left of screen, type “msconfig” in the Start Search box.
Enter.

Click on the Tools tab.
Choose “Disable UAC”
Click “Launch”.

You should see a window saying the operation was completed successfully.

Reboot the system and log on as administrator.
Register the program.

Run msconfig again.
Click on the Tools tab.
Choose “Enable UAC”
Click “Launch”.

Reboot the system again and your program should be properly registered.
