

Recommendations for Windows 8 Desktop Personalization

In order to facilitate navigation to often-used features in Windows 8, we recommend customizing your Windows 8 Desktop to add the icons for Computer, Control Panel, and Network (if your workstation is running on a Network). You can do so by following the steps below.

1. Click on the Desktop to open it
2. Right click on **Open Desktop**
3. Left click **Personalize**
4. Left click **Change Desktop Icons**
5. Check the boxes for desired icons
6. [Apply] or [OK]
